

PATENT
09/899,615

In the Claims:

Please amend the claims to read:

- 1 1. (withdrawn) In a World Wide Web (Web) communication
2 network with user access through a plurality of data
3 processor controlled user interactive receiving display
4 stations, a system for buying products offered from a
5 plurality of Web sites comprising:
 - 6 means for displaying a shopping cart representation at
7 a receiving display station;
 - 8 means at said receiving display station enabling a user
9 to load into said shopping cart a plurality of
10 representations of products offered from said plurality of
11 Web sites;
 - 12 means at said receiving display station enabling said
13 user to select to buy a set of said loaded products; and
14 means for transmitting to each of a plurality of Web
15 sites offering the products selected to buy by said user,
16 billing data required of said user to buy said products.
- 1 2. (withdrawn) The Web system for buying products of claim 1
2 wherein said Web sites offering products provide Web pages
3 specifying the offered products.
- 1 3. (withdrawn) The Web system for buying products of claim 2
2 further including:
 - 3 means enabling the user to switch from one Web page
4 offering products to another Web page offering products; and
5 means for moving said shopping cart from said one Web
6 page to another when said user switches from said one page
7 to another.

1 4. (withdrawn) The Web system for buying products of claim 3
2 wherein said moved shopping cart includes products loaded
3 into said shopping cart from said one page.

1 5. (withdrawn) The Web system for buying products of claim 4
2 further including means enabling the user to selectively
3 remove products loaded into said shopping cart.

1 6. (withdrawn) The Web system for buying products of claim 4
2 wherein said moved shopping cart further includes cumulative
3 cost data of the loaded products from all of said Web sites.

1 7. (withdrawn) The Web system for buying products of claim 4
2 further comprising:

3 Web browsing means at said receiving display station
4 including:

5 said means for displaying a shopping cart
6 representation at a receiving display station;

7 said means enabling a user to load into said shopping
8 cart a plurality of representations of products offered from
9 said plurality of Web sites;

10 said means enabling said user to select to buy a set of
11 said loaded products; and

12 said means for transmitting said billing data to each
13 of a plurality of Web sites offering the products selected
14 to buy by said user.

PATENT
09/899,615

1 8. (withdrawn) The Web system for buying products of claim 7
2 wherein said Web browsing means further includes:

3 said means enabling the user to switch from one Web
4 page offering products to another Web page offering
5 products; and

6 said means for moving said shopping cart from said one
7 Web page to another when said user switches from said one
8 page to another.

9 9. (currently amended) In a World Wide Web communication
10 network with user access through a plurality of data
11 processor controlled user interactive receiving display
12 stations, a method for buying products offered from a
13 plurality of World Wide Web sites comprising:

14 offering products from said plurality of World Wide Web
15 sites:

16 displaying a shopping cart representation at a
17 receiving display station;

18 enabling a user at said receiving display station to
19 load into said shopping cart a plurality of representations
20 of products offered from said plurality of World Wide Web
21 sites;

22 enabling said user at said receiving display station
23 to select to buy a set of said loaded products; and

24 transmitting to each of a said plurality of World Wide
25 Web sites offering the products selected to buy by said
26 user, billing data required of said user to buy said
27 products.

1 10. (currently amended) The method for buying products of
2 claim 9 wherein said World Wide Web sites offering products
3 provide Web pages specifying the offered products.

PATENT
09/899,615

- 1 11. (original) The method for buying products of claim 10
2 further including the steps of:
3 enabling the user to switch from one Web page offering
4 products to another Web page offering products; and
5 moving said shopping cart from said one Web page to
6 another when said user switches from said one page to
7 another.
- 1 12. (currently amended) The method for buying products of
2 claim 11 wherein said moved shopping cart includes products
3 loaded into said shopping cart from said one Web page.
- 1 13. (original) The method for buying products of claim 12
2 further including the step of enabling the user to
3 selectively remove products loaded into said shopping cart.
- 1 14. (currently amended) The method for buying products of
2 claim 12 wherein said moved shopping cart further includes
3 cumulative cost data of the loaded products from all of said
4 World Wide Web sites.

PATENT
09/899,615

1 15. (currently amended) The method for buying products of
2 claim 11 further comprising:
3 a World Wide Web browsing process at said receiving
4 display station including:
5 said step of displaying a shopping cart representation
6 at a receiving display station;
7 said step of enabling a user to load into said shopping
8 cart a plurality of representations of products offered from
9 said plurality of World Wide Web sites;
10 said step of enabling said user to select to buy a set
11 of said loaded products; and
12 said step of transmitting said billing data to each of
13 a plurality of World Wide Web sites offering the products
14 selected to buy by said user.

1 16. (currently amended) The method for buying products of
2 claim 15 wherein said World Wide Web browsing process
3 further includes said steps of:
4 enabling the user to switch from one Web page offering
5 products to another Web page offering products; and
6 moving said shopping cart from said one Web page to
7 another when said user switches from said one page to
8 another.

7

PATENT
09/899,615

1 17. (withdrawn) A computer program having code recorded on a
2 computer readable medium for buying products offered from a
3 plurality of Web sites in a Web communication network with
4 user access via a plurality of data processor controlled
5 interactive receiving display stations, said program
6 comprising:

7 means for displaying a shopping cart representation at
8 a receiving display station;

9 means at said receiving display station enabling a user
10 to load into said shopping cart a plurality of
11 representations of products offered from said plurality of
12 Web sites;

13 means at said receiving display station enabling said
14 user to select to buy a set of said loaded products; and

15 means for transmitting to each of a plurality of Web
16 sites offering the products selected to buy by said user,
17 billing data required of said user to buy said products.

1 18. (withdrawn) The computer program of claim 17 wherein
2 said web sites offering products provide Web pages
3 specifying the offered products.

1 19. (withdrawn) The computer program of claim 18 further
2 including:

3 means enabling the user to switch from one Web page
4 offering products to another Web page offering products; and

5 means for moving said shopping cart from said one Web
6 page to another when said user switches from said one page
7 to another.

PATENT
09/899,615

1 20. (withdrawn) The computer program of claim 19 wherein
2 said moved shopping cart includes products loaded into said
3 shopping cart from said one page.

1 21. (withdrawn) The computer program of claim 20 further
2 including means enabling the user to selectively remove
3 products loaded into said shopping cart.

1 22. (withdrawn) The computer program of claim 20 wherein
2 said moved shopping cart further includes cumulative cost
3 data of the loaded products from all of said Web sites.

1 23. (withdrawn) The computer program of claim 20 further
2 comprising:

3 a Web browser program at said receiving display station
4 including:

5 said means for displaying a shopping cart
6 representation at a receiving display station;

7 said means enabling a user to load into said shopping
8 cart a plurality of representations of products offered from
9 said plurality of Web sites;

10 said means enabling said user to select to buy a set of
11 said loaded products; and

12 said means for transmitting said billing data to each
13 of a plurality of Web sites offering the products selected
14 to buy by said user.

9

PATENT
09/899,615

1 24. (withdrawn) The computer program of claim 23 wherein
2 said Web browser program further includes:
3 said means enabling the user to switch from one Web
4 page offering products to another Web page offering
5 products; and
6 said means for moving said shopping cart from said one
7 web page to another when said user switches from said one
8 page to another.
